

Providing Tactical Precision

Our platform's greatest differentiator is Payload Agnostic Power: the ability to carry heavy, diverse Payloads, whether sensors or effects, and seamlessly integrate with other unmanned systems, as demonstrated by thousands of hours of Time on Water. We are the only platform stable enough to act as a "mothership" for the marsupial deployment of other vessels while fast enough to outmaneuver threats. Our platforms allow the Navy to swarm contested zones with low-cost, high-endurance assets, ensuring that human operators remain safe while the mission, whether ISR or kinetic, is executed with tactical precision.

MANTAS T12

DEVIL RAY T18

MUSKIE M18

DEVIL RAY T24

DEVIL RAY T38

MANTAS T12

The **MANTAS T12** is MARTAC's most sought after MANTAS system and is available in full production. At 12 feet (3.6 meters) with a maximum payload capacity of 140 lbs (64 kgs) and swarming capability, it's a robust system for littoral environments, hosted from a mothership or nested within Devil Ray Systems. The MANTAS platform is highly reliable with thousands of hours of continuing operations worldwide.

SPECIFICATIONS

- **Length** - 12 ft (3.6 m)
- **Max Payload** - 140 lbs (64 kg)
- **Powertrain** - Electric
- **Burst Speed** - 30+ kts
- **Missions** - ISR, Stealth Operations, Transport

DEVIL RAY T18

The **Devil Ray T18** is MARTAC's compact, high-performance USV engineered to deliver persistent maritime capability in contested or denied environments where agility and resilience matter. Purpose-built for rapid response and sustained operations, the Devil Ray T18 bridges the gap between pocket-sized attritable assets and larger fleet nodes, bringing burst speeds of over 60 knots and sensor fusion into a single, deployable platform.

SPECIFICATIONS

- **Length** - 19.8 ft (6.0 m)
- **Max Payload** - 750 lbs (340 kg)
- **Powertrain** - Twin Inboard Gas
- **Burst Speed** - 60+* kts
- **Missions** - ISR, Kinetic, Stealth Operations

MUSKIE M18

The **Muskie M18** is MARTAC's purpose-built, one-way attritable surface strike asset with significant payload capacity engineered from the keel up to seek, pursue, and attrite hostile surface targets. The platform's clean mono-hull lines and low-profile silhouette deliver a naturally reduced radar cross-section and visual signature, making the Muskie difficult to detect, deny, acquire, and counter in contested littorals.

SPECIFICATIONS

- **Length** - 19.3 ft (5.9 m)
- **Max Payload** - 1,000 lbs (450 kg)
- **Powertrain** - Inboard Diesel Jet Drive
- **Burst Speed** - 50+* kts
- **Missions** - One-way Kinetic, Security, Patrol

DEVIL RAY T24

The **Devil Ray T24** is the newest addition to MARTAC's suite of mission-focused products. The T24 is quickly proving to be a highly stable platform capable of many different missions with a remarkable payload capacity of 1,800 lbs (817 kgs), making it a workhorse in unmanned maritime capability.

SPECIFICATIONS

- **Length** - 24 ft (7.2 m)
- **Max Payload** - 1,800 lbs (817 kg)
- **Powertrain** - Inboard Diesel (Optional Gas)
- **Burst Speed** - 60+* kts
- **Missions** - ISR, Kinetic, Stealth Operations, Security, Patrol

DEVIL RAY T38

The **Devil Ray T38** is MARTAC's flagship platform, equipped with an inboard powertrain and capable of carrying diverse payloads, allowing forces to address their specific operational requirements. With burst speeds over 60+ kts dependent on sea state and an unmatched payload capacity, the Devil Ray T38 is the pinnacle of hybrid fleet augmentation, a platform our adversaries thought possible only in their nightmares.

SPECIFICATIONS

- **Length** - 38 ft (11.1 m)
- **Max Payload** - 4,000 lbs (1,814 kgs)
- **Powertrain** - Inboard Diesel (Optional Gas)
- **Burst Speed** - 60+ kts
- **Missions** - ISR, Kinetic, Security, Patrol, Deployment
